

## ***I wish myself another world***

*I wish myself another world*

*a world without private property  
but with the right for each person  
to live in one place according to his needs*

*a world without money with interests  
but only with interest-free exchange currencies  
and free giving and receiving*

*a world without exploitation of human beings,  
ressources and nature*

*a world where people don't eat meat  
so that all people on Earth have enough to eat*

*a world without using poison against animals and plants  
and only biological agriculture*

*a world without private cars  
besides of cars from companies and camping van  
but Car-Sharing, enough public transport for free  
and people giving each other a lift  
who want to go in the same direction*

*a world with a system of refund  
which helps to recycle all packages*

*a world where all used energies are renewable*

*a world where all washing and cleaning products  
are biodegradable*

*a world where nearly only recycling paper is used...*

*And what is the world you wish to live in?*
